# AIBUCUO
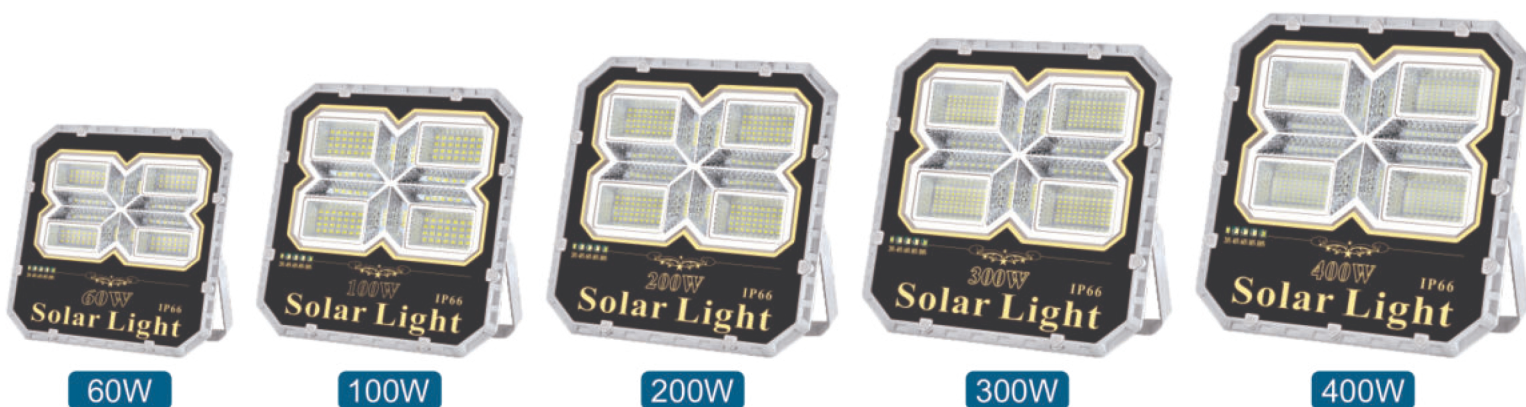

FLOOD LIGHT

Solar projector lamp series

T-D

产品特点
Product Features

1. High-density die-cast aluminum lamp body, corrosion-resistant.

2. Large-capacity lithium iron phosphate battery, large-scale five-grid polycrystalline photovoltaic panel, and national standard precision waterproof wire.

3. High brightness LED light source, high light efficiency: small light decay: no ultraviolet radiation, and the life span is as long as 50,000 hours.

4. Tempered glass mask, scientific light distribution, high light transmission, impact resistance, flame retardant, and strong thermal stability.

5. Function control: wireless remote control + intelligent light control + power display + fast charging without hindrance.

6. Waterproof grade IP66, physical structure waterproof + sealing strip. Applicable to villages, roads, gardens, villas, resorts, etc.
